

Management Resources Ltd of NY was pleased to be part of a three month old international cold case investigation. We were contacted by Investigator Fernando Fernandez, owner of the Covert Intelligence Group in Puerto Rico. He requested our assistance in locating the missing relatives of Mr. Paul Wong, who died of liver cancer in Puerto Rico. Mr. Wong's body lay unclaimed in the Forensic Institute of Puerto Rico.

After agreeing to assist in the investigation, we sent Investigator Scott Wagner to the Chinatown area of New York City as well as multiple locations in Brooklyn, NY. He conducted interviews and developed leads that indicated Mr. Wong may have relatives in Singapore. Armed with information from both the Covert Intelligence Group and Management Resources, Investigator Ponno Kalestree started his end of the investigation in Malaysia and ending in Singapore where he located the daughter of Mr. Wong. Mr. Wong's daughter had lost contact with her father for over nineteen years and was extremely grateful for the efforts put forth so her father would have a proper burial. It was very satisfying for us to be part of this multi-national investigation. Congratulations to Investigator Fernandez for never giving up.
